

Managing DITA reuse with oXygen XML Editor

Alex Jitianu

alex_jitianu@oxygenxml.com

Agenda

- Content references
- Conditional content
- Conditional publishing
- Controlled values (Subject scheme)
- Indirection (working with keys)

Inserting the SIM card

Inserting the SIM card

Step 1

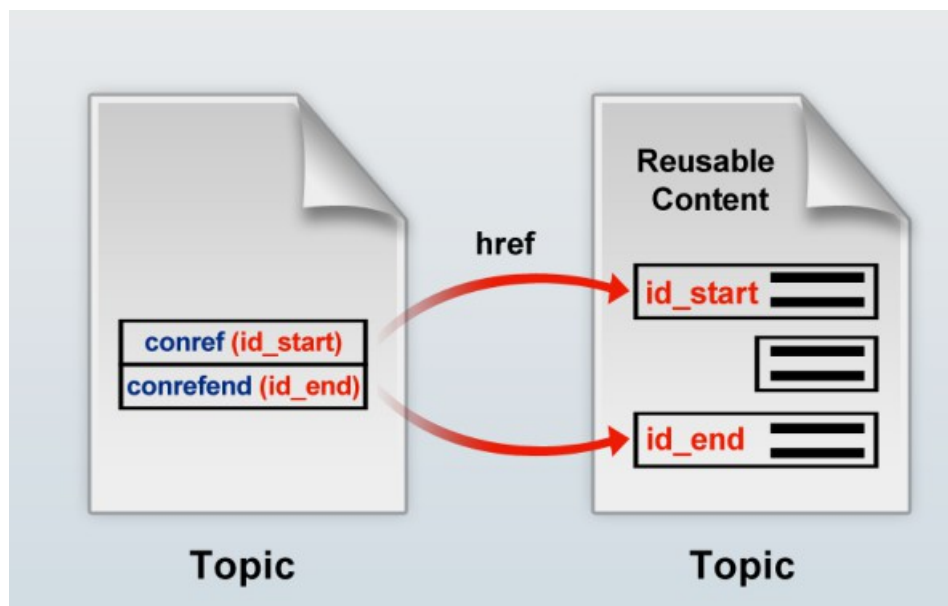

Step 2

Step 3

Content reference range

Profiling case: multiple models

Profiling case

X1000

X2000

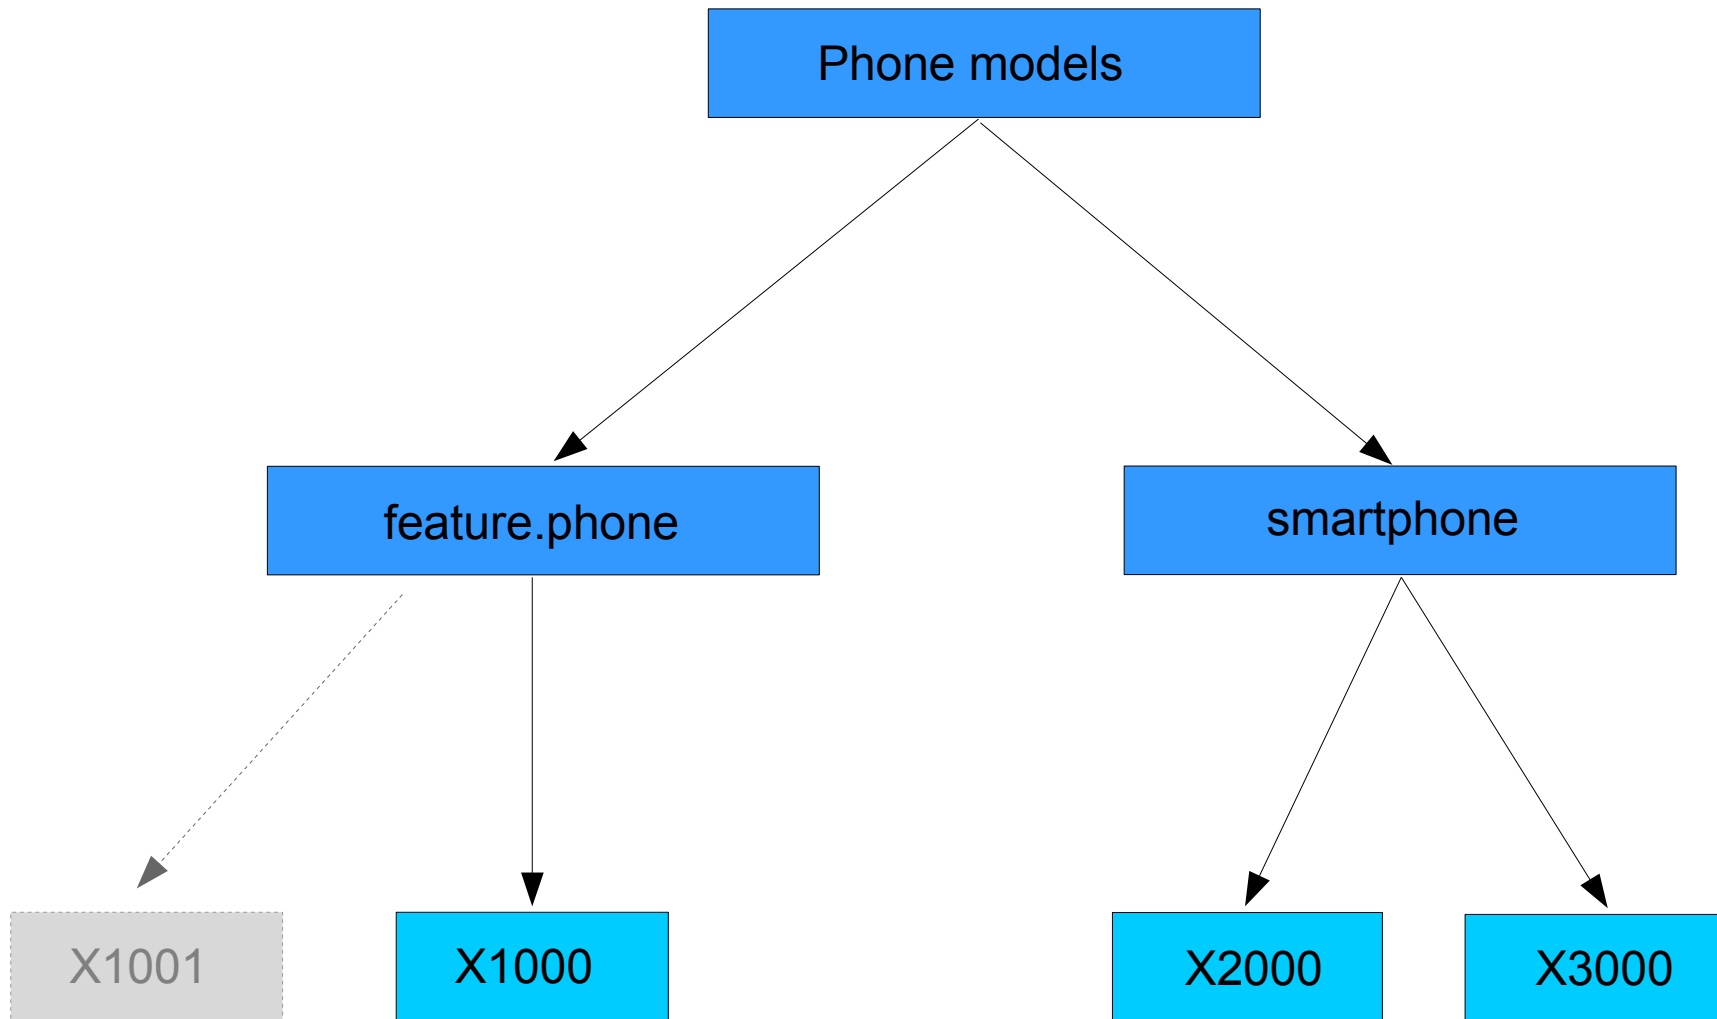

Profiling/Conditional Content

- Define/Edit profiling attributes
 - “Show profiling attributes”
 - “Profiling color and styles”
- Profiling Conditions Sets
 - Editing
 - Publishing
- Conditional publishing
- Validate and check for completeness

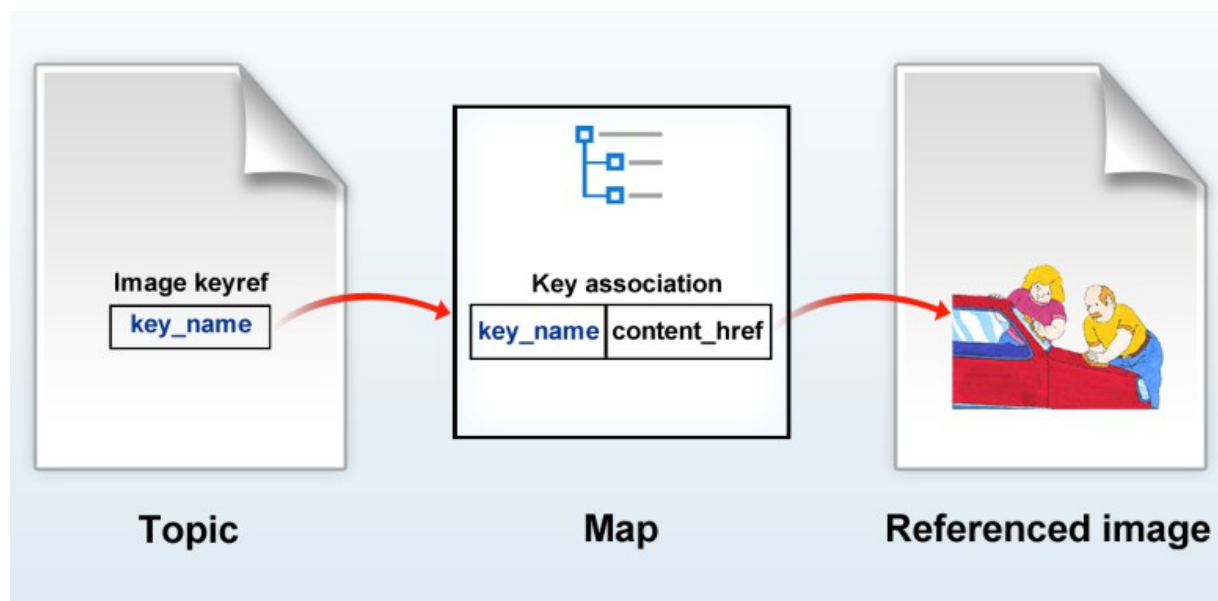

Mobile phone taxonomy

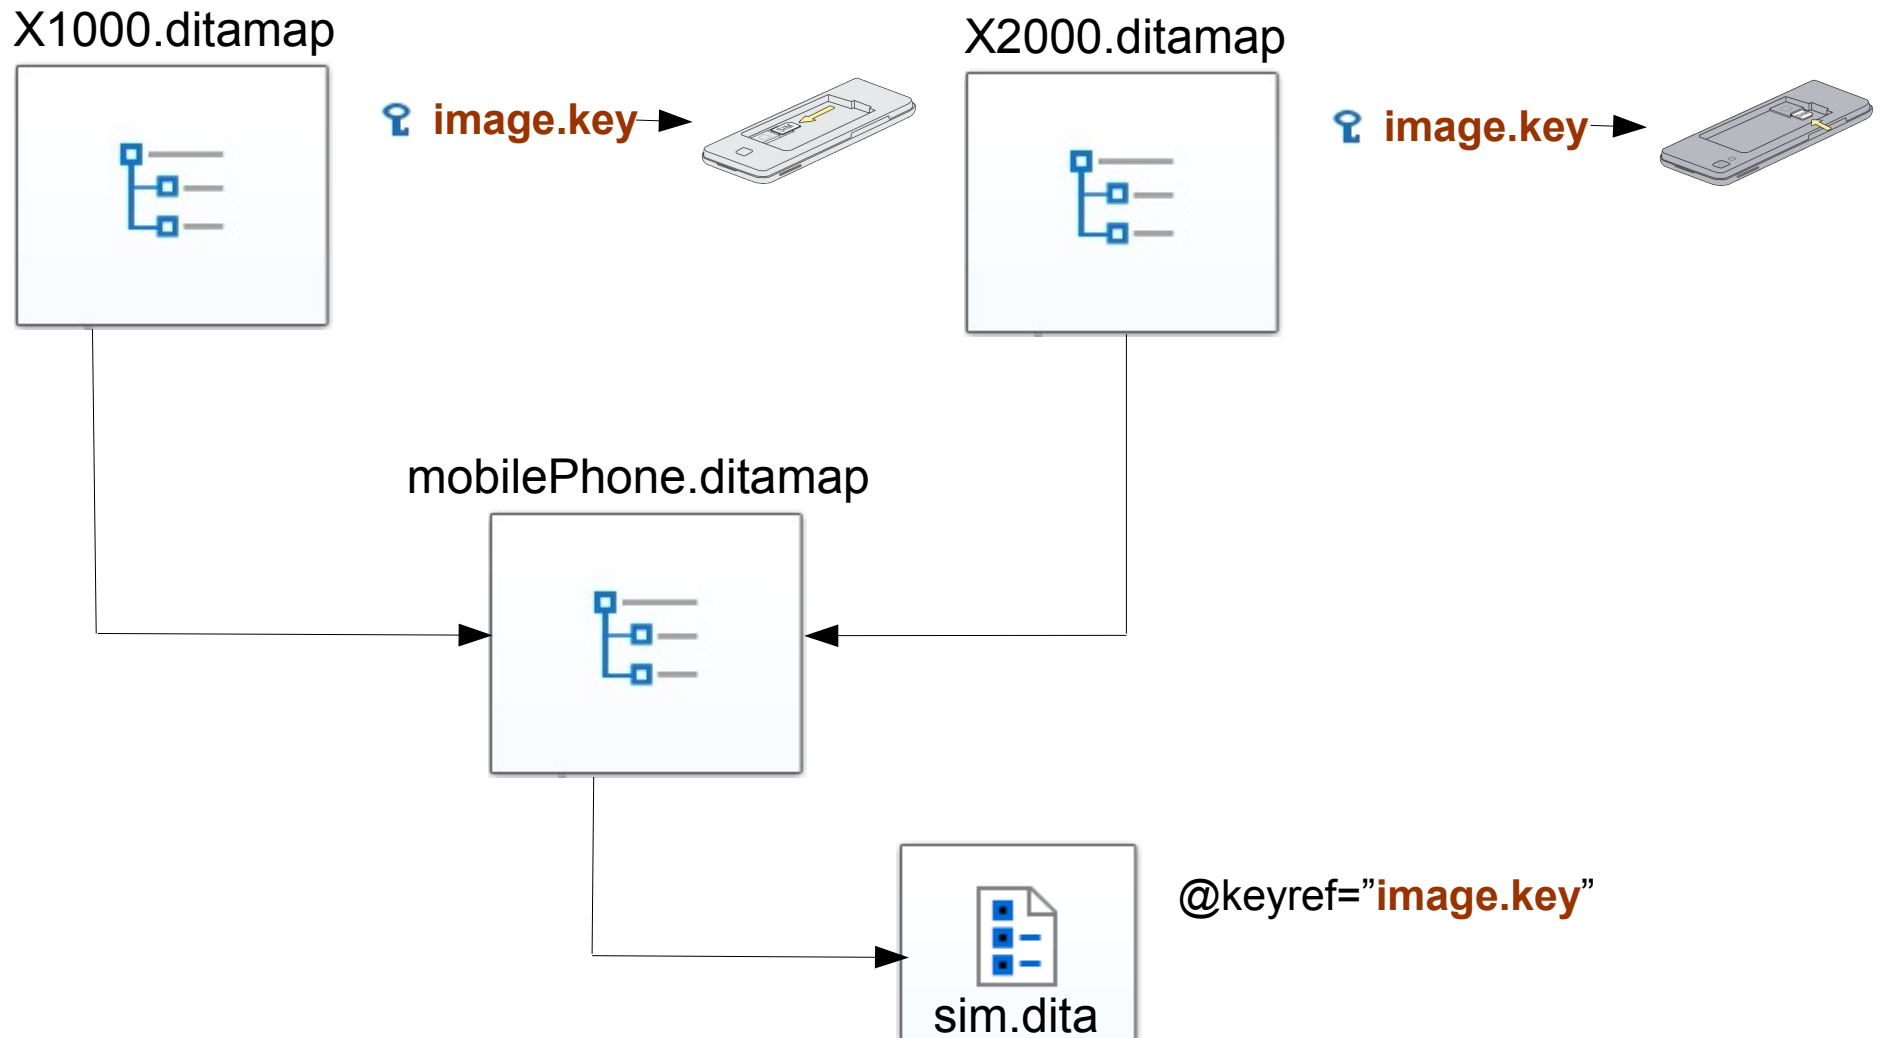

Mobile phone taxonomy

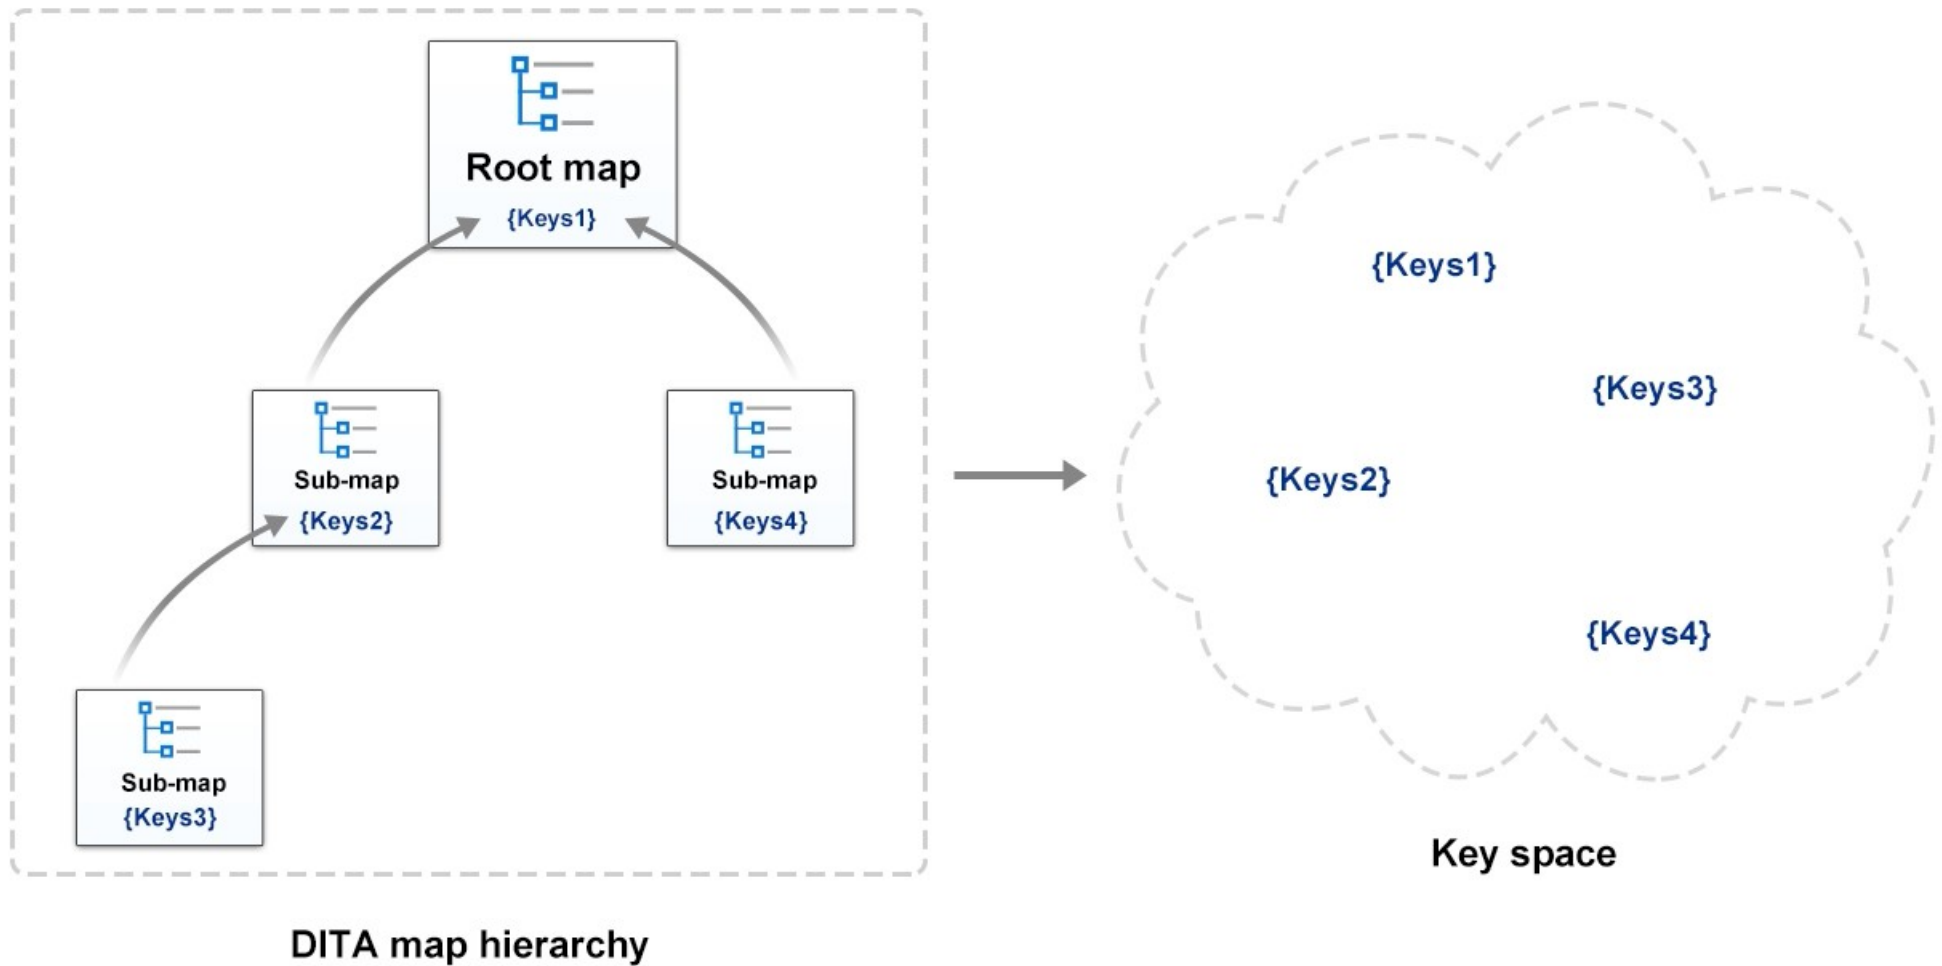

Indirection (Keys)

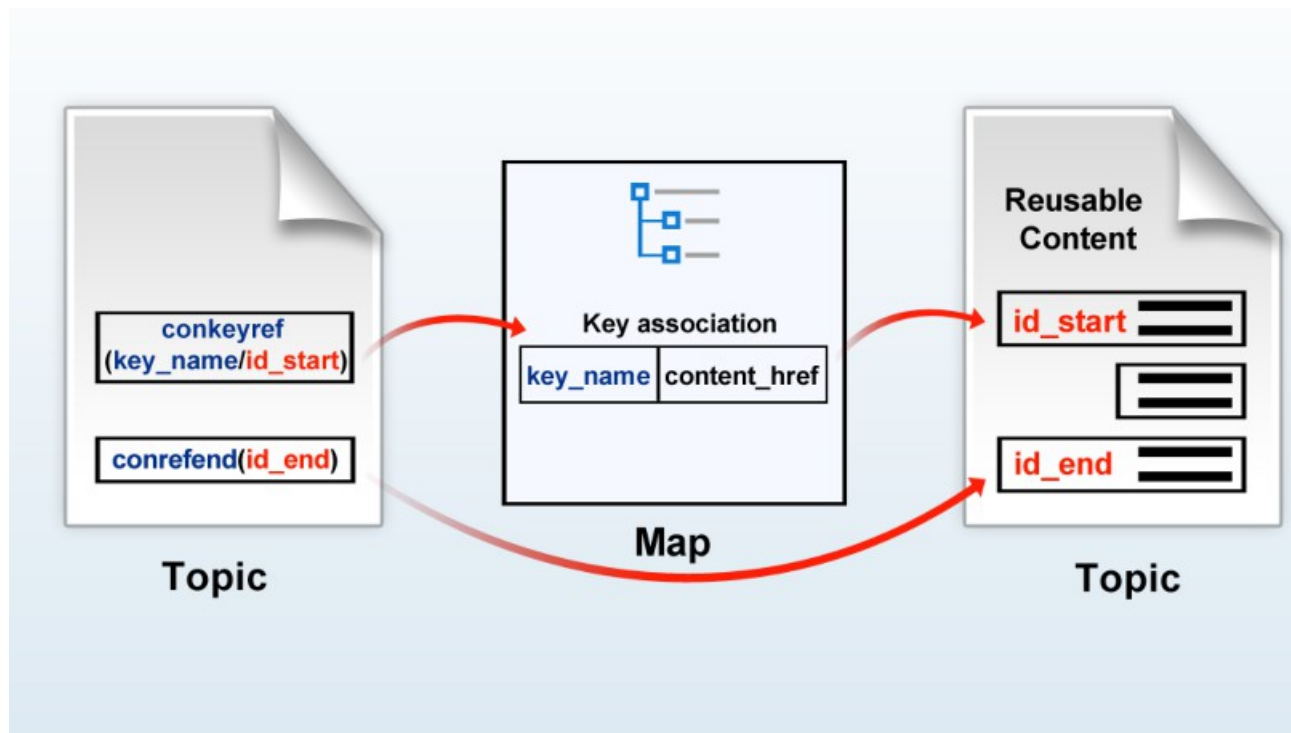

Indirection

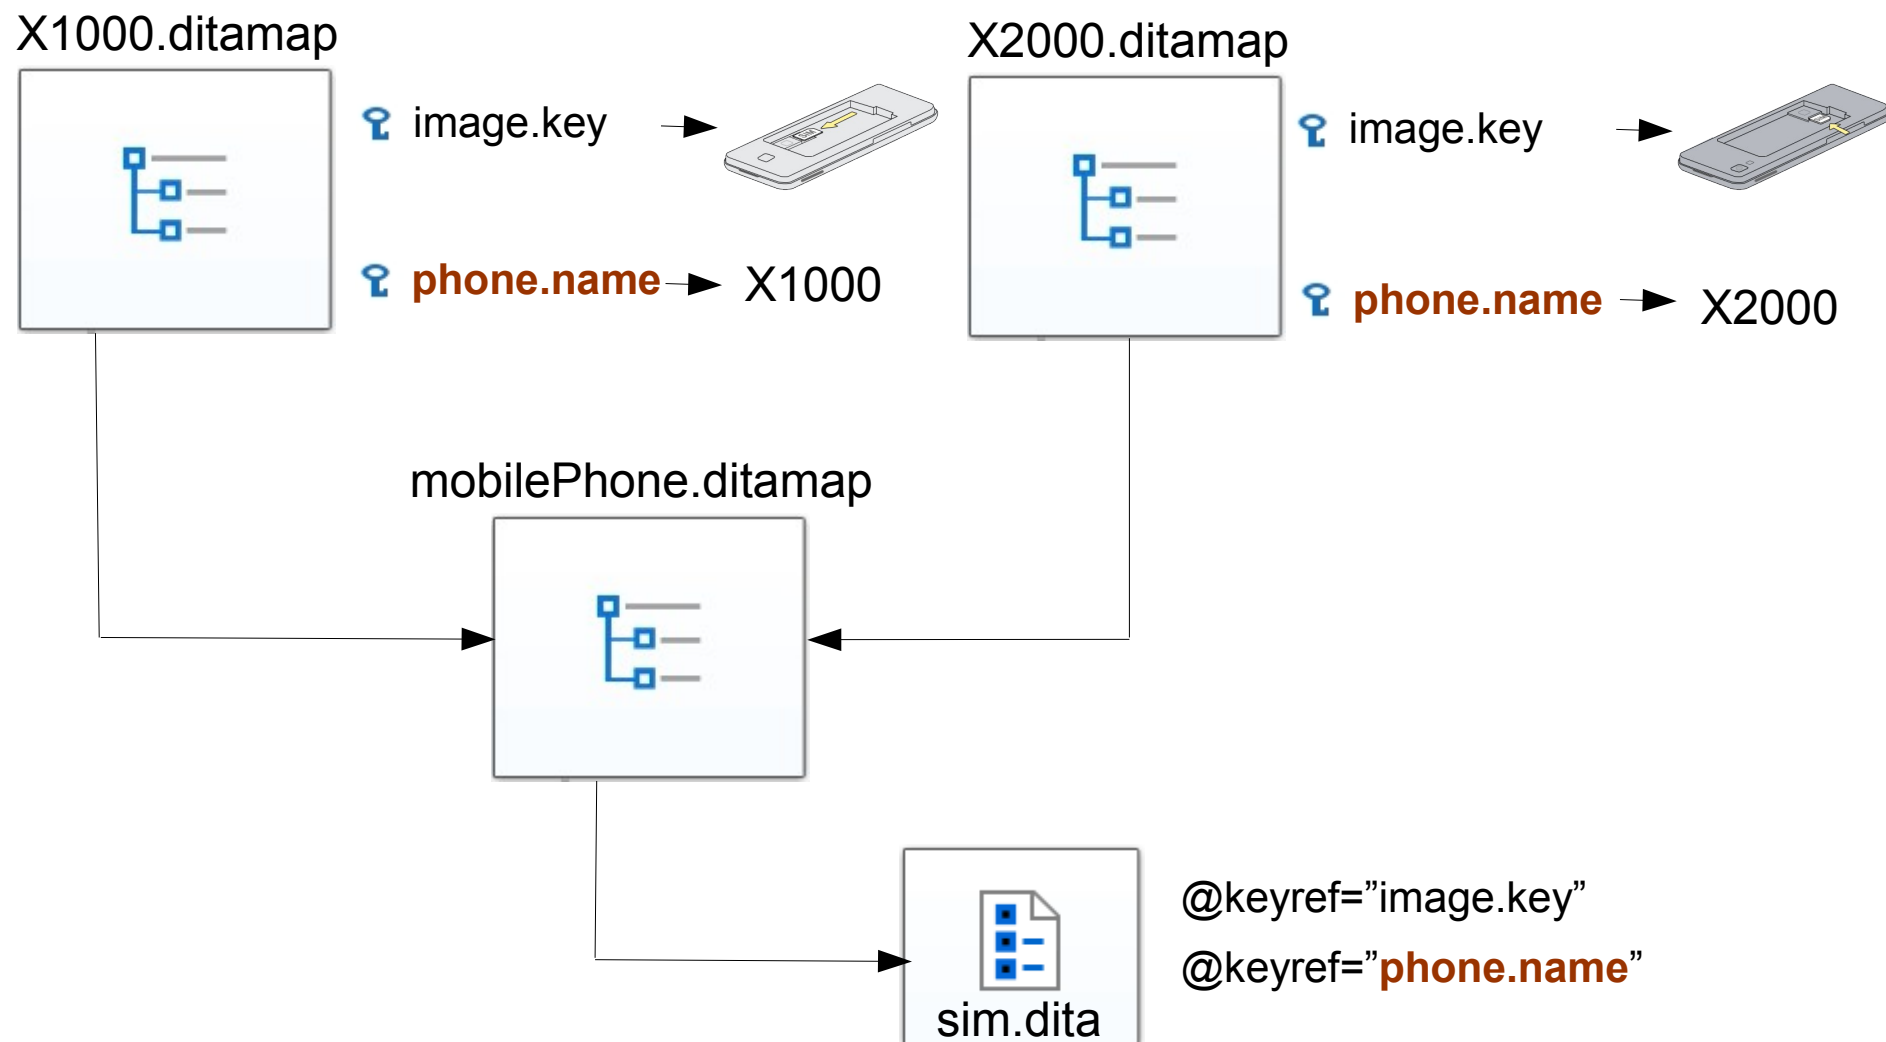

Root Map

Indirect content reference

Variables

Variables

mobilePhone.ditamap

🔑 phone.name @product="X1000"

🔑 phone.name @product="X2000"

```
<keydef keys="phone.name" product="X1000">
  <topicmeta>
    <keywords>
      <keyword>X1000 Model</keyword>
    </keywords>
  </topicmeta>
</keydef>
```

```
<keydef keys="phone.name" product="X2000">
  <topicmeta>
    <keywords>
      <keyword>X2000 Model</keyword>
    </keywords>
  </topicmeta>
</keydef>
```

What we've seen

- Subject scheme
- Indirection
 - Key references and content key references
 - Key based conditional publishing
- Root map and key space

Thank you!
