

Plugin development

Alex Jitianu

alex_jitianu@oxygenxml.com

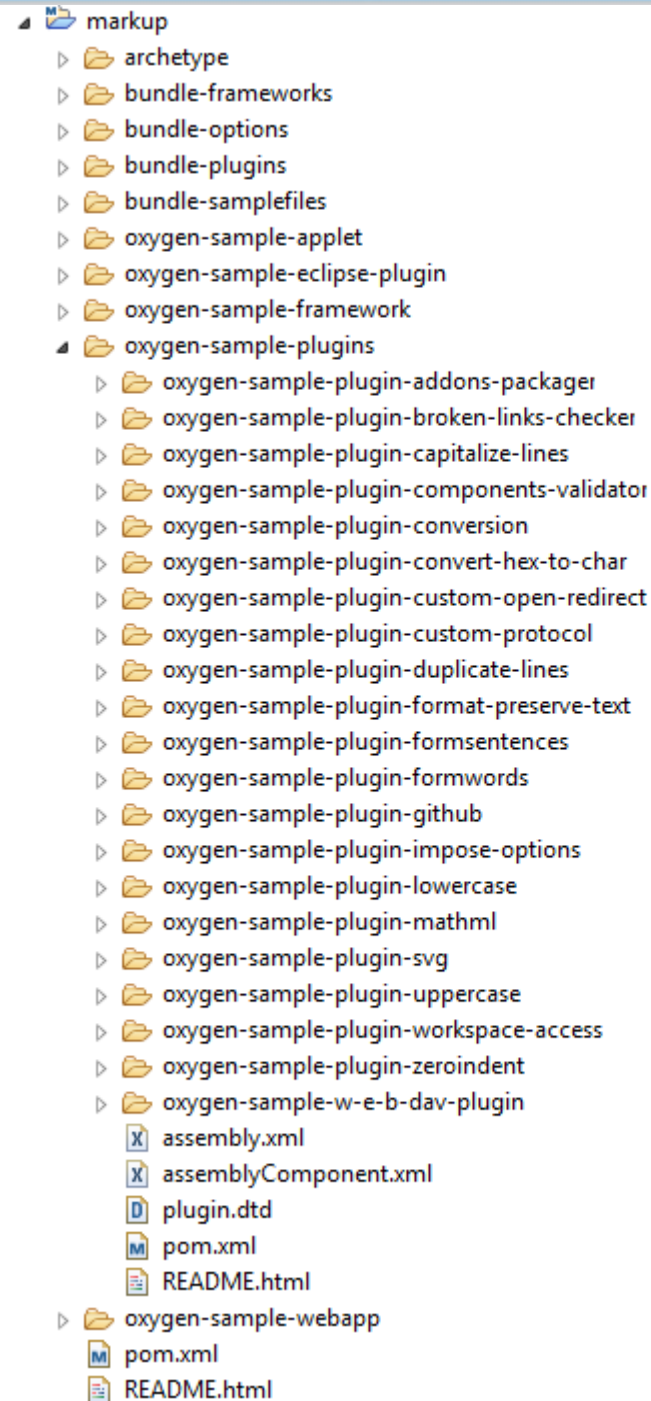

Prerequisites

- Install JDK
- Install Maven on your system
- Configure `.m2/settings.xml`
 - Repository: <http://www.oxygenxml.com/maven>
- Install the Eclipse IDE for Java EE Developers (or an Eclipse with the m2e plugin), version 4.3 or later:
 - <https://www.eclipse.org/downloads/>

The SDK

- a collection of Maven artifacts
- a multi-module startup project
 - Demo: create one in Eclipse

SDK project structure

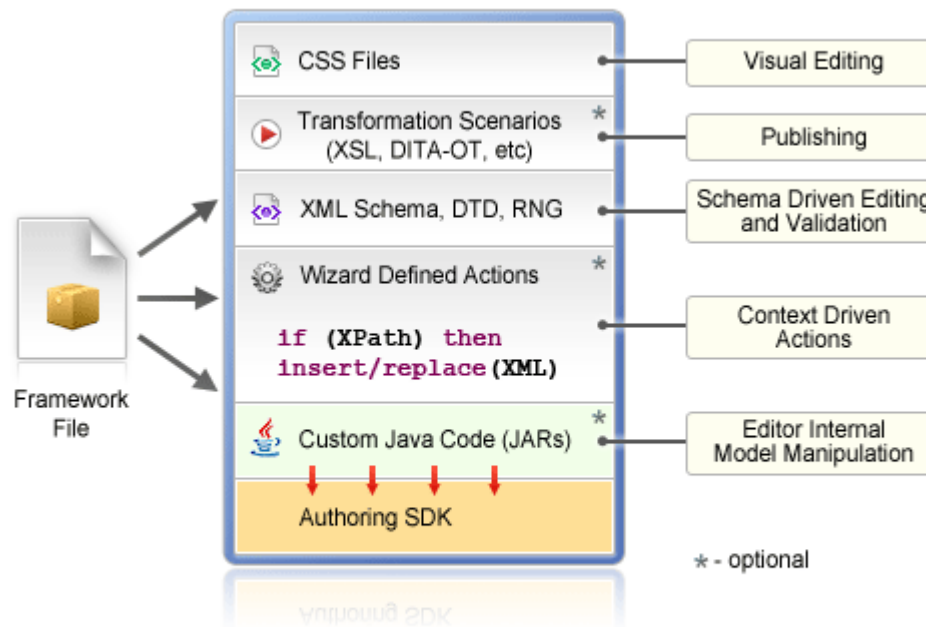

SDK project structure

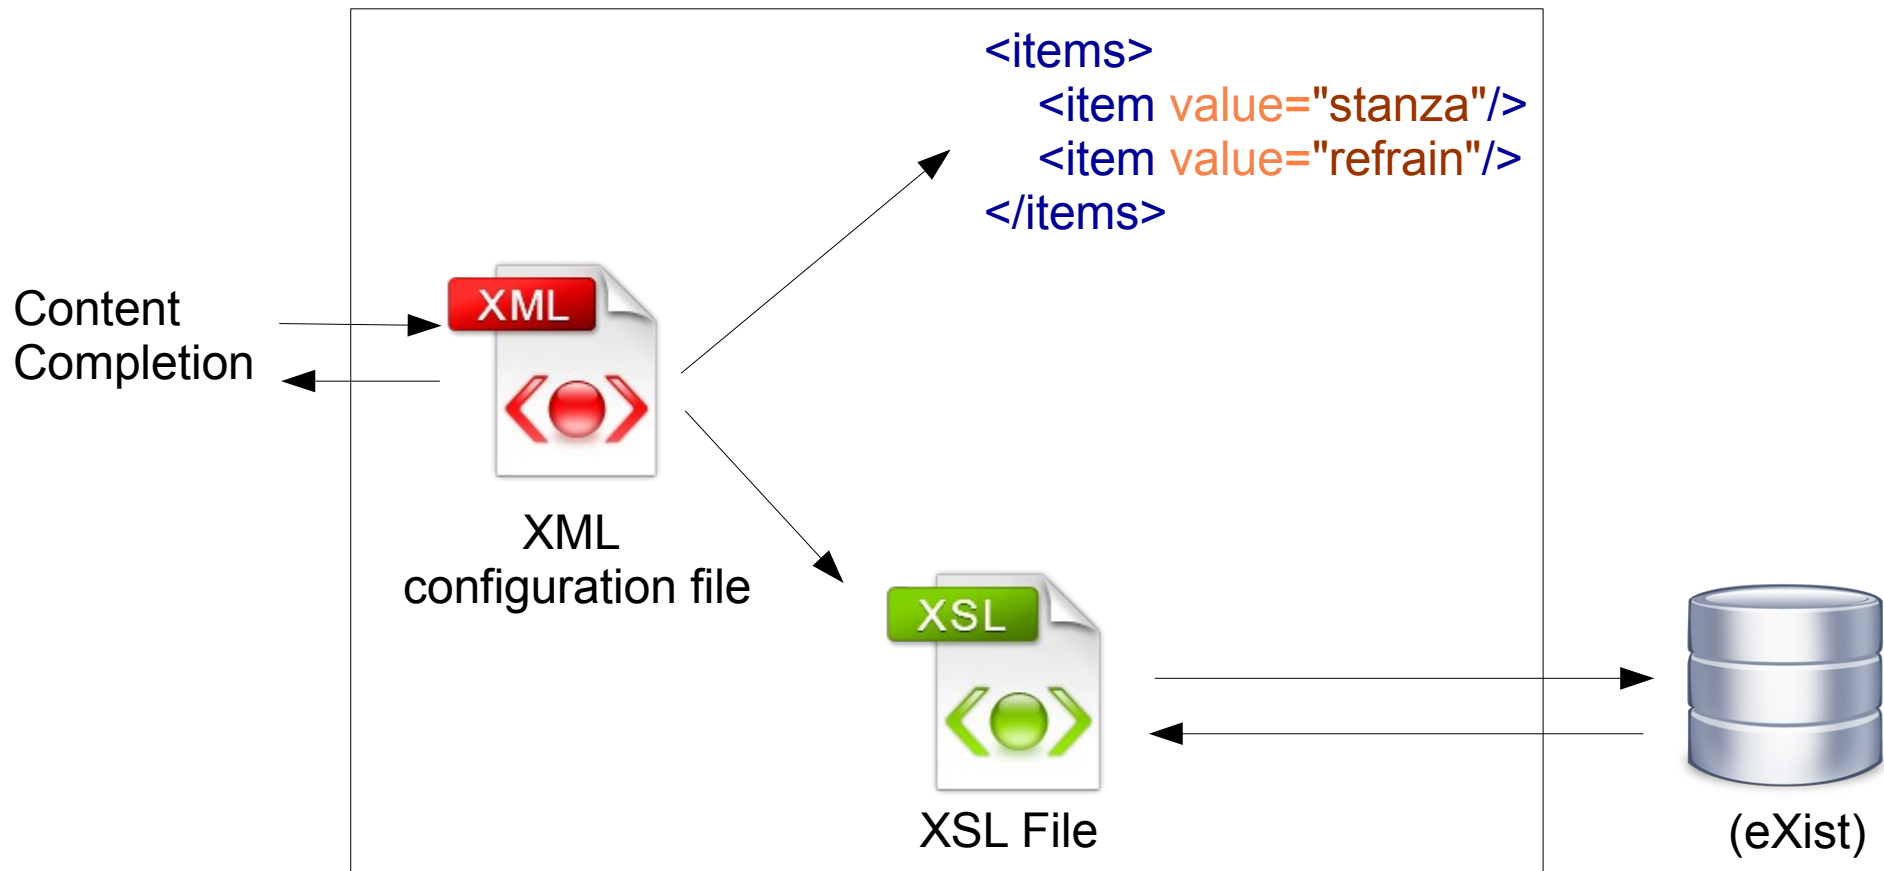

- helpers -

- **bundle-frameworks**
- **bundle-options**
- **bundle-plugins**
- **bundle-samplefiles**

Author Framework Development

Author framework development

Java API: `ro.sync.contentcompletion.xml.SchemaManagerFilter`

Author Framework Development

oxygen-sample-framework

- Simple Documentation Framework
- The source code for DITA, DocBook, TEI, and XHTML extensions

Component/Applet Integration

Custom Desktop Application

Java Applet

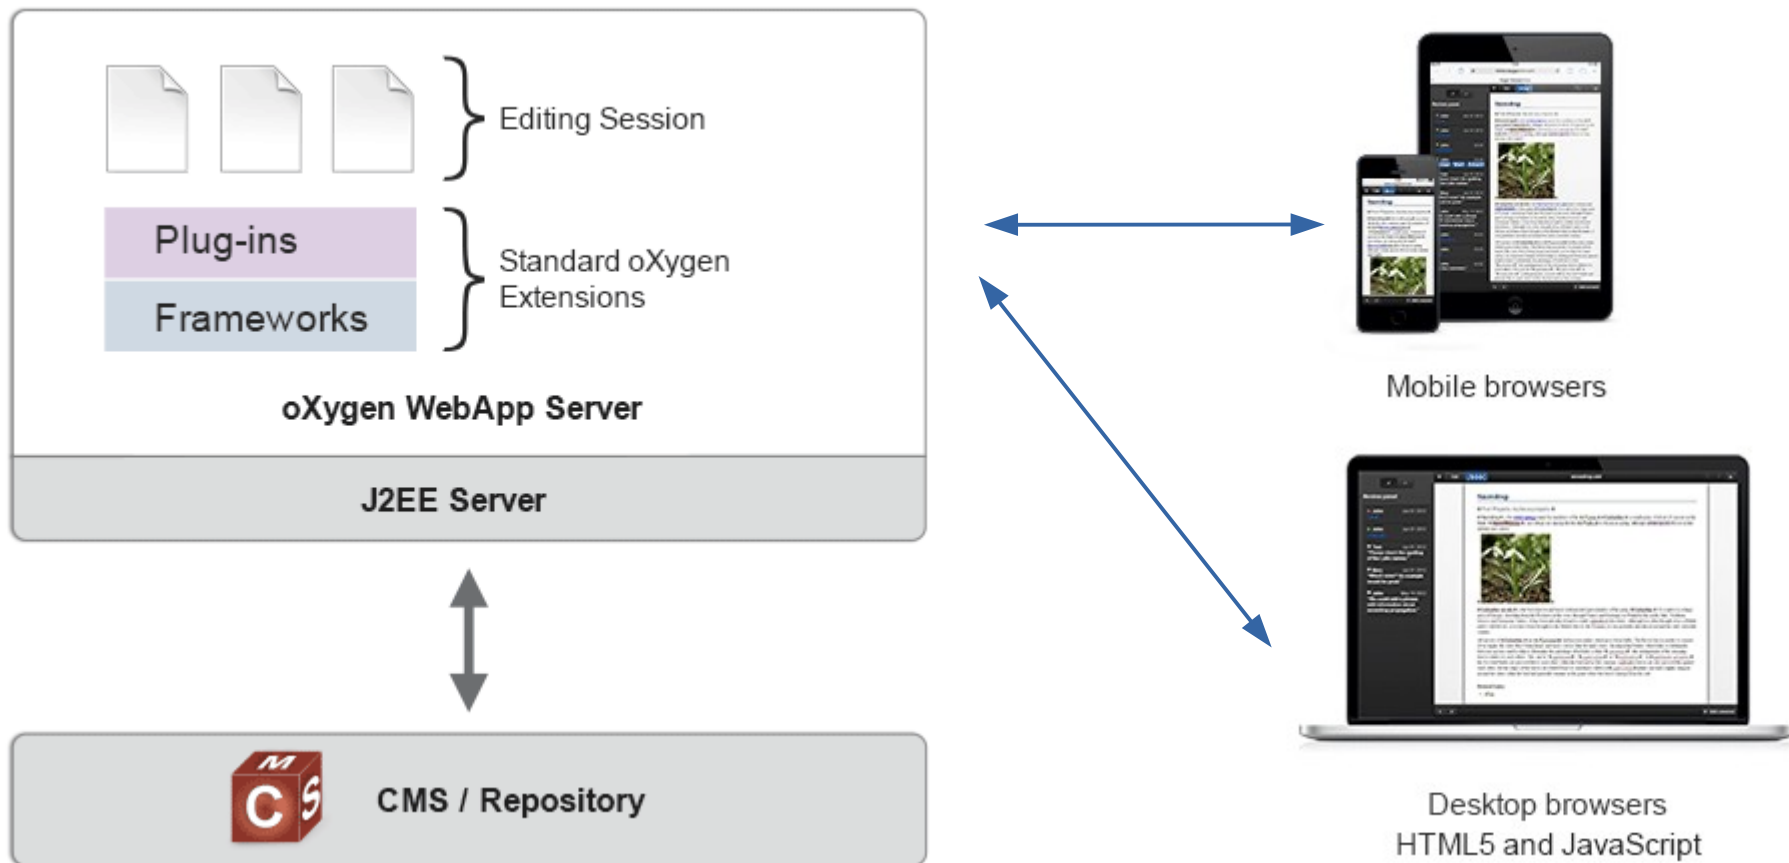

Component/Applet Integration

oxygen-sample-applet

- **bundle-options**
- **bundle-plugins**
- **bundle-frameworks**

oXygen XML WebApp Integration

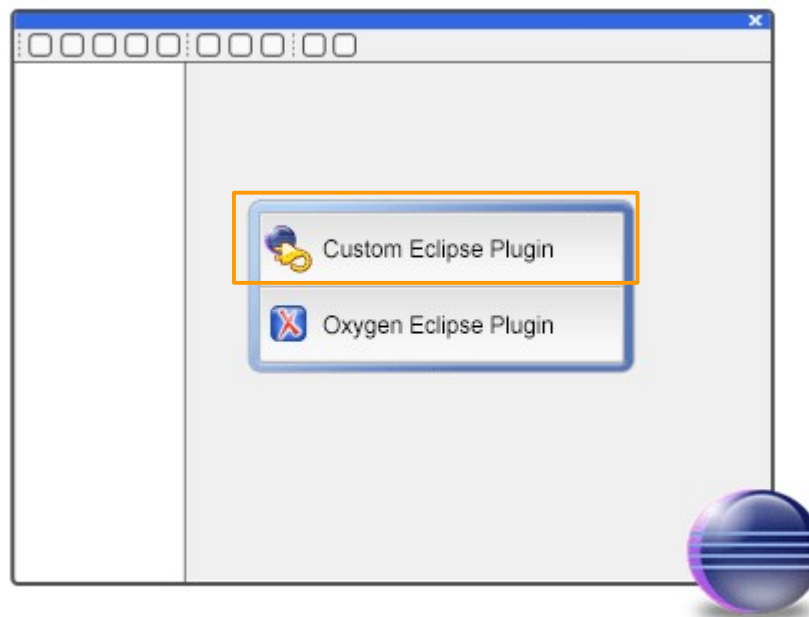

oXygen XML WebApp Integration

oxygen-sample-webapp

- bundle-options
- bundle-frameworks
- bundle-plugins
 - (oxygen-sample-plugin-custom-protocol)
- bundle-samplefiles

Eclipse IDE Integration

- oxygen-sample-eclipse-plugin

Plugins for the Standalone Distribution

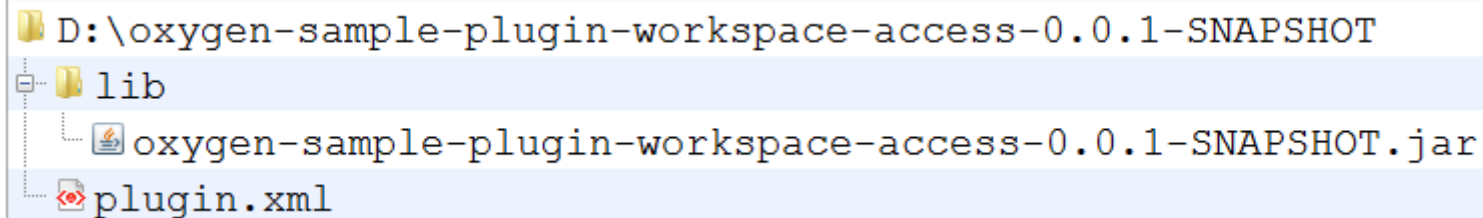

Plugins for the Standalone Distribution

- **oxygen-sample-plugins**
 - oxygen-sample-plugin-addons-packager
 - oxygen-sample-plugin-custom-protocol
 - oxygen-sample-plugin-workspace-access

Plugin structure

A screenshot of a file explorer window showing the directory structure of a plugin workspace. The path is D:\oxygen-sample-plugin-workspace-access-0.0.1-SNAPSHOT. The structure includes a 'lib' folder containing 'oxygen-sample-plugin-workspace-access-0.0.1-SNAPSHOT.jar' and a 'plugin.xml' file.

```
D:\oxygen-sample-plugin-workspace-access-0.0.1-SNAPSHOT
├── lib
│   └── oxygen-sample-plugin-workspace-access-0.0.1-SNAPSHOT.jar
└── plugin.xml
```

Plugin descriptor

```

<plugin
  id="com.oxygenxml.plugin.WorkspaceAccess"
  name="CustomWorkspaceAccess"
  description="Test"
  version="${project.version}"
  vendor="SyncRO"
  class="demo.prague.markup.workspace.WorkspaceAccessPlugin"
  classLoaderType="preferReferencedResources">
  <runtime>
    <library name="lib/${project.build.finalName}.jar"/>
  </runtime>
  <extension type="WorkspaceAccess"
    class="demo.prague.markup.workspace.CustomWorkspaceAccessPluginExtension"/>
  <view id="SampleWorkspaceAccessID" initialSide="WEST" initialRow="0"/>
  <toolbar id="SampleWorkspaceAccessToolbarID" initialSide="NORTH"
    initialRow="1"/>
</plugin>

```

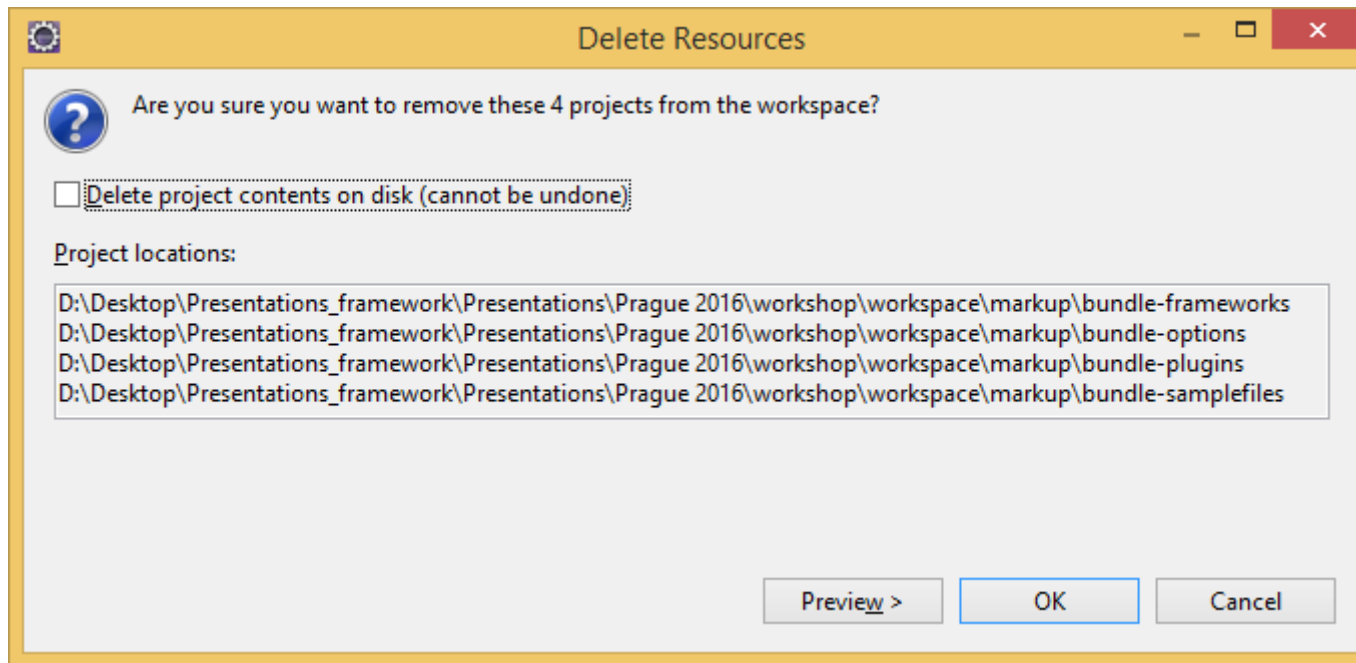

EXTENSION TYPES:

URLStreamHandler
 WorkspaceAccess
 OpenRedirect
 Components Validator

.....

Cleanup

- Keep what you need -

Workspace Access

- Views
- Toolbars
- Menubar
- Editors
- Utilities (UtilAccess & XMLUtilAccess)

Helper View requirements

`<xref href="https://en.wikipedia.org/wiki/Prague" format="html">Prague</xref>`

Workspace Access plugin

```
public class WorkspaceAccessPlugin extends Plugin {
    /**
     * The static plugin instance.
     */
    private static WorkspaceAccessPlugin instance = null;

    /**
     * Constructs the plugin.
     *
     * @param descriptor The plugin descriptor
     */
    public WorkspaceAccessPlugin(PluginDescriptor descriptor) {
        super(descriptor);

        if (instance != null) {
            throw new IllegalStateException("Already instantiated!");
        }
        instance = this;
    }

    /**
     * Get the plugin instance.
     *
     * @return the shared plugin instance.
     */
    public static WorkspaceAccessPlugin getInstance() {
        return instance;
    }
}
```

Workspace Access plugin

```
/**
 * Plugin extension - workspace access extension.
 */
public class CustomWorkspaceAccessPluginExtension implements WorkspaceAccessPluginExtension {

    /**
     * @see ro.sync.exml.plugin.workspace.WorkspaceAccessPluginExtension#applicationStarted(
     *      ro.sync.exml.workspace.api.standalone.StandalonePluginWorkspace)
     */
    @Override
    public void applicationStarted(final StandalonePluginWorkspace pluginWorkspaceAccess) {

    }

    /**
     * @see ro.sync.exml.plugin.workspace.WorkspaceAccessPluginExtension#applicationClosing()
     */
    @Override
    public boolean applicationClosing() {
        return true;
    }
}
```

Contribute a view

```
// Intercept the view creation.
pluginWorkspaceAccess.addViewComponentCustomizer(new ViewComponentCustomizer() {
    @Override
    public void customizeView(ViewInfo viewInfo) {
        if ("SampleWorkspaceAccessID".equals(viewInfo.getViewID())) {
            // Our view, that we contributed from plugin.xml
            JPanel viewPanel = new JPanel(new BorderLayout());
            entriesList = new JList<String>(terms.keySet().toArray(new String[0]));

            entriesList.addMouseListener(new MouseAdapter() {
                public void mouseClicked(java.awt.event.MouseEvent e) {
                    if (e.getClickCount() == 2 && !e.isPopupTrigger()) {
                        Object selectedValue = entriesList.getSelectedValue();
                        if (selectedValue != null) {
                            String match = (String) selectedValue;

                            insertEntry(match);
                        }
                    }
                }
            });

            viewPanel.add(entriesList, BorderLayout.CENTER);

            viewInfo.setComponent(viewPanel);
        }
    }
});
```

Deploy

Run as-> Maven build...

Launch Oxygen

Text page

Author page

- Author node model
- Author document controller

Add a toolbar item

```
<toolbar id="SampleWorkspaceAccessToolbarID" initialSide="NORTH" initialRow="1"/>
```

```
pluginWorkspaceAccess.addToolbarComponentsCustomizer(new ToolbarComponentsCustomizer() {  
    @Override  
    public void customizeToolbar(ToolbarInfo toolbarInfo) {  
        if ("SampleWorkspaceAccessToolbarID".equals(toolbarInfo.getToolbarID())) {  
            Action action = new AbstractAction() {  
                @Override  
                public void actionPerformed(ActionEvent e) {  
                    pluginWorkspaceAccess.showView("SampleWorkspaceAccessID", true);  
                }  
            };  
            action.putValue(Action.NAME, "Show Reference View");  
            // Get an image.  
            ToolbarButton b = new ToolbarButton(action, false);  
  
            b.setIcon(new ImageIcon(getClass().getResource("/images/ShowHelp16.png")));  
            toolbarInfo.setComponents(new JComponent[] {b});  
        }  
    }  
});
```

Highlights – Text Page

```
WSXMLTextEditorPage textPage = (WSXMLTextEditorPage) currentPage;
try {
    WSXMLTextNodeRange[] ranges = textPage.findElementsByXPath("//xref");
    JTextArea textComponent = (JTextArea) textPage.getTextComponent();
    Highlighter highlighter = textComponent.getHighlighter();
    // TODO Not great because we will remove highlights added by someone else.
    highlighter.removeAllHighlights();

    HighlightPainter painter = new DefaultHighlighter.DefaultHighlightPainter(Color.PINK);
    for (int i = 0; i < ranges.length; i++) {
        int start = textPage.getOffsetOfLineStart(ranges[i].getStartLine()) + ranges[i].getStartColumn() - 1;
        int end = textPage.getOffsetOfLineStart(ranges[i].getEndLine()) + ranges[i].getEndColumn() - 1;

        highlighter.addHighlight(start, end, painter);
    }
} catch (XPathException e) {
    e.printStackTrace();
}
```

Highlights – Author Page

```
WSAuthorEditorPage authorPage = (WSAuthorEditorPage) currentPage;

AuthorDocumentController documentController = authorPage.getDocumentController();
AuthorNode[] nodes = documentController.findNodesByXPath("//xref", true, true, true);

AuthorHighlighter highlighter = authorPage.getHighlighter();
// TODO Not great because we will remove highlights added by someone else.
highlighter.removeAllHighlights();
RectangleHighlightPainter painter =
    new RectangleHighlightPainter(ro.sync.exml.view.graphics.Color.COLOR_YELLOW);
for (int i = 0; i < nodes.length; i++) {
    highlighter.addHighlight(nodes[i].getStartOffset(), nodes[i].getEndOffset(), painter, null);
}
```

Persistent highlights – Author Page

`<?oxy_custom_start prop1="val1"....?> xml content <?oxy_custom_end?>`

```
WSAuthorEditorPage authorPage = (WSAuthorEditorPage) currentPage;
```

```
AuthorPersistentHighlighter persistentHighlighter =  
                                authorPage.getPersistentHighlighter();
```

Editor events

```
// Step 4. contribute to contextual menu. Listen for page open events.
pluginWorkspaceAccess.addEditorChangeListener(new WSEditorChangeListener() {
    @Override
    public void editorOpened(URL editorLocation) {
        final WSEditor editorAccess = pluginWorkspaceAccess.getEditorAccess(editorLocation, PluginWorkspace.MAIN_EDITING_AREA);
        install(editorAccess);
        editorAccess.addPageChangeListener(new WSEditorPageChangeListener() {
            @Override
            public void editorPageChanged() {
                install(editorAccess);
            }
        });
    }
}, PluginWorkspace.MAIN_EDITING_AREA);
```

Contextual menu

```
WSEditorPage currentPage = editorAccess.getCurrentPage();
if (currentPage instanceof WSXMLTextEditorPage) {
    ((WSXMLTextEditorPage) currentPage).removePopupMenuCustomizer(textPopupCustomizer);
    ((WSXMLTextEditorPage) currentPage).addPopupMenuCustomizer(textPopupCustomizer);
} else if (currentPage instanceof WSAuthorEditorPage) {
    ((WSAuthorEditorPage) currentPage).removePopupMenuCustomizer(authorPopupCustomizer);
    ((WSAuthorEditorPage) currentPage).addPopupMenuCustomizer(authorPopupCustomizer);
}
```

INSTALL

```
// Step 4.1. Text page popUp customizer.
textPopupCustomizer = new TextPopupMenuCustomizer() {
    @Override
    public void customizePopupMenu(Object popUp, WSTextEditorPage textPage) {
        JPopupMenu jPopupMenu = (JPopupMenu) popUp;
        customize(jPopupMenu);
    }
};

// Step 4.1. Author page popUp customizer.
authorPopupCustomizer = new AuthorPopupMenuCustomizer() {
    @Override
    public void customizePopupMenu(Object popUp, AuthorAccess authorAccess) {
        JPopupMenu jPopupMenu = (JPopupMenu) popUp;
        customize(jPopupMenu);
    }
};
```
