## Agenda

- What's new?
- Demo
- Plans for the future
- Q&A

## What's New? (Desktop)

- Team management for Positron service subscriptions
- AI service configuration via JSON file for Positron Enterprise
- *Google Gemini* and *Vertex AI* connectors in Positron Enterprise
- Automatic validation and correction of the AI-generated content
- Rules saved as persistent memories
- Record prompts with your voice
- Trigger Positron actions from chat
- GPT-4.1
- ...and many more!

## What's New? (Web)

- *Google Gemini* and *Vertex AI* connectors in Positron Enterprise
- Attach files to the conversation using drag-n-drop or copy/paste
- Persistent chat across editors
- Persistent chat history in *Content Fusion*
- Improved function call Information and message rendition
- GPT-4.1

## What's New? (Eclipse)

- Easier installation and updating, using the update site support
- AI-enabled file templates
- Support for more editors (C/C++, Java, Python, plain text, etc.)
- Create custom AI actions more easily
- *Google Gemini* connector
- Generate documentation drafts
- GPT-4.1

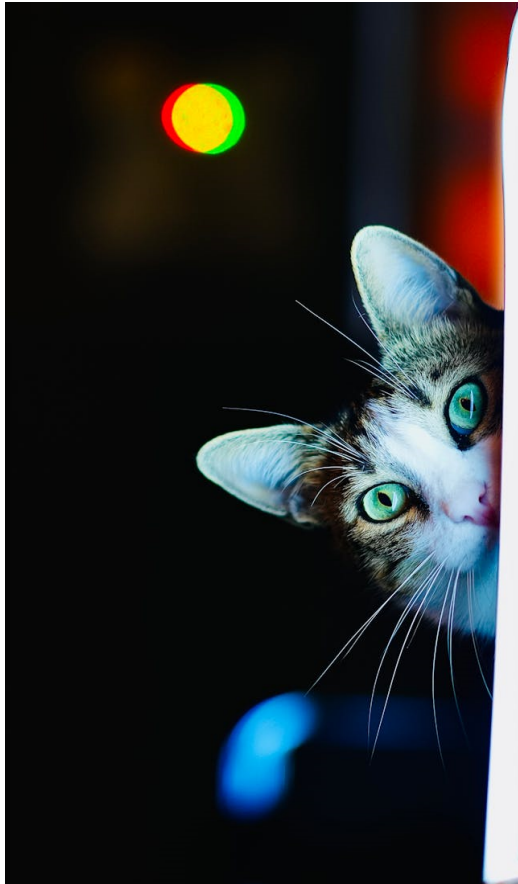

## Demo Time!

## Plans for the Future

- Chat modes – distinct configurations with different sets of available functions, tailored for specific scenarios.
- Port more features to Positron for *Web Author* and *Content Fusion*: call Positron actions from chat, automatic validation and correction, etc.
- MCP – enhance the Positron assistant with *Model Context Protocol* capabilities to improve model context awareness and control.
- Connecting to more AI platforms via Positron service.
- Better AI integration in Oxygen v28 – *New file* wizard, *Fast Create Topics*, etc.
- Improve and refine the existing features, the UI, and the UX.
